

Sahir Hameed

Fort Worth, Texas | sahirhameed@utexas.edu | [linkedin.com/in/sahirhameed](https://www.linkedin.com/in/sahirhameed) | github.com/SahirHameed

SKILLS

Languages: Python, Java, C/C++, C#, JavaScript, TypeScript, SQL, HTML5, CSS

Frameworks & Libraries: .NET, React.js, Node.js, Next.js

DevOps & Tools: Git (GitLab, GitHub), CI/CD Pipelines, Docker, DBeaver, Agile/Scrum, RESTful APIs, AWS

Databases: SQL Server, PostgreSQL, MySQL, Oracle SQL, NoSQL

AI/ML Tools: LangChain, OpenAI API, TensorFlow, GenAI Coding Assistants (Cline, Copilot, Claude), Prompt Engineering

EXPERIENCE

Lockheed Martin

Remote

Data & AI Engineer

May 2025 – Present

- Architecting a full-stack document lifecycle automation system using C# .NET, Python, and GitLab, implementing automated email notifications, archival workflows, and version-controlled repository storage for enterprise document management
- Designed and deployed RESTful API integrations connecting SAP BusinessObjects WebI with GitLab repositories, enabling automated data extraction and migration for compliance and long-term storage
- Developed Python automation scripts for data pipeline operations, backup procedures, and system integrations, reducing manual overhead by 20% and improving operational efficiency
- Optimized SQL Server queries and restructured database schemas, improving application performance by 30% and reducing load times for 100+ enterprise users
- Collaborated in Agile/Scrum teams to gather requirements, troubleshoot system issues, and deliver scalable internal web applications with continuous integration practices

University of Texas at Austin

Austin, TX

Undergraduate Research Assistant

Dec 2024 – May 2025

- Designed high-performance client/server architecture using CXL shared memory for distributed systems, implementing infrastructure as code for repeatable deployments
- Developed multithreaded C++ applications with object-oriented design patterns, optimizing resource management and transaction retry policies

Medex Surgical

Fort Worth, TX

Software Engineering Intern

May 2024 – Aug 2024

- Designed and deployed an API development project for an inventory management system using Excel's VBA and JavaScript, improving visibility across 100+ hospitals in an Agile/DevOps environment.
- Implemented CI/CD pipeline enhancements and workflow optimizations, reducing manual errors by 30% and saving users 15 hours/week

PROJECTS

Seblea | TypeScript, Node.js, Supabase, RESTful API

[Visit Website](#)

- Building Seblea, an all-in-one leasing and roommate finder application with Supabase database integration and RESTful API architecture, utilizing CI/CD pipelines and Git-based version control for automated deployment
- Implementing responsive UI components with HTML5, CSS, and TypeScript to deliver an intuitive user experience for verified listings, roommate matching, and seamless lease management

Video Game Sales Prediction | Python, Jupyter Notebook, scikit-learn

- Collaborated in an Agile team of 4 to build and optimize a predictive model, improving R^2 accuracy by 83% through hyperparameter tuning, iterative testing, and data-driven evaluation metrics
- Integrated third-party APIs for data retrieval and implemented automated data processing pipelines to ensure accurate global sales predictions

Web Page Summarizer | JavaScript, OpenAI API

- Developed Chrome extension utilizing RESTful API integration with OpenAI's GPT-3.5 Turbo for real-time web content summarization and enhanced user feedback mechanisms
- Applied prompt engineering and LangChain framework to optimize API performance and response accuracy

EDUCATION

The University of Texas at Austin

Austin, TX

B.S. in Computer Science; Minor in Business

Dec 2025

- Relevant Coursework:** Machine Learning, Computer Networks, Compilers, Modern Web Applications, Data Structures, Discrete Math, Algorithms and Complexity, Computer Architecture, Operating Systems, Autonomous Robotics
